-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Drawings

1. Figures 1-4 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 6 and 13 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

4. Claim 6 recites the limitation "the rough portion" in line 2. There is insufficient antecedent basis for this limitation in the claim. Further "on a rough portion" on line 3, should also be amended to avoid double inclusion.

5. Claim 13 recites the limitation "the rough portion" in line 2. There is insufficient antecedent basis for this limitation in the claim. Further "on a rough portion" on line 3, should also be amended to avoid double inclusion.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3723

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claims 1, 2, 5, 8, 9, 12 and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by ROC 323 469.

ROC '469 discloses all of the limitations of claims 1, 8 and 15, i.e., a needle comprising a sharp end including tapered portion having a cross section of a loop of teeth (e.g., Figs. 1 and 5), defining raised elements which are a plurality of spaced curves (e.g., x-sec Figs. 2 and 3), and wherein a plurality of needles are fastened on a sleeve (e.g., Fig. 4).

Regarding claims 2, 5, 9 and 12, ROC '469 meets the limitations.

8. Claims 1-3, 5, 8-10, 12 and 15 are rejected under 35 U.S.C. 102(e) as being anticipated by Crocker (US 6,890,319).

Crocker discloses all of the limitations of claims 1, 8 and 15, i.e., a needle comprising a sharp end including tapered portion having a cross section of a loop of teeth (e.g., through 21 in Fig. 2D), defining raised elements which are a plurality of rightward or leftward spaced curves, and wherein a plurality of needles are fastened on a sleeve (Fig. 5).

Regarding claims 2, 3, 5, 9, 10 and 12, ROC '469 meets the limitations.

Claim Rejections - 35 USC § 103

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. Claims 4, 6, 7, 11, 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Crocker in view of Park et al. (US Pub 2002/0082543).

Crocker meets all of the limitations of the above claims, as indicated above, except for disclosing the grooves (21) to intersect and the type an/or roughness of the surface. With regards to grooves intersecting, Crocker discloses that the shape depends on the substance being delivered and the surface to which the substance is being delivered.

Park et al. also teaches needles having grooves and made of different materials depending on the application, Page 4. It would have been obvious to one of ordinary skill in the art, at the time the invention was made, to modify the invention of Crocker with intersecting grooves and different materials forming the surface of the needle depending on the application as taught by Park et al. to manipulate the transport of the substance (e.g., paragraph 72).

Conclusion

11. Prior art made of record and not relied upon are considered pertinent to applicant's disclosure. Fukuda et al., Matsutani et al., Jang, Holt and Metzner are cited to show related inventions.
